## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 9/17/03 has been considered by the examiner.

### ***Request for Interference***

The request for interference is not granted due to the following new ground of rejection.

### ***Claim Rejections - 35 USC § 112***

Claims 61-78 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Each of independent claims 61, 62, 63, 70 and 73 recites "the improvement wherein the curvatures in a sub-scanning direction of two of the surfaces of said imaging lens vary continuously along a main scanning direction over the effective area of said imaging lens and independently of the curvatures in the main scanning direction, and wherein the curvatures in the main and sub-scanning directions are non-symmetrical with respect to the optical axis". The recited feature contains a new matter because it is not supported by the original disclosure. Table 5 on page 48 of the present application and Table 5 on page 27 of the Japan priority paper #8-046741 clearly show that the curvatures in the main scanning

direction of the second surface of the imaging lens are **symmetrical** with respect to the optical axis.
